

FLOODLIGHT CAGES

Product Code WOOD/133

Features and benefits

- Practical, compact and attractive design
- All stainless steel construction
- Vandal resistant features
- Corrosion resistant

Product information

Woodroffe Floodlight Cages provide a secure and attractive housing for floor-mounted external and internal floodlights.

The fabricated wire mesh cage features reinforcing bars welded under the mesh, at all corners and all joints to provide additional stiffness.

The body is made from brush finish 2mm thick stainless steel sheet and fastens to the ground through 4 mounting holes. A decorative punched pattern is featured on the rear face.

The cage is secured to the body using security fasteners, which require a special tool to remove.

The Adelaide City Council type floodlight cage is illustrated – alternative designs are available on request.

Adelaide City Council floodlight cage designed by:

Width 670mm

Height 665mm

Length 668mm

Note: Sizes are subject to change without notice
